DRINKING WATER WARNING RESCINDED

Out of an abundance of caution, customers of San Simeon Community Services District (SSCSD) were notified on 9/27/2025 that **one** location in the water system exceeded the action level for lead. As reported in that notification, SSCSD coordinated resamples at the location with the elevated lead levels.

We are pleased to report that a resample was collected on 9/28/2025 and results were 2.3 parts per billion; **the results of this sample and the 90th percentile for SSCSD are below the lead action level of 15 parts per billion, which means that SSCSD can rescind the previously issued warning.** We apologize for any inconvenience and thank you for your patience.

SSCSD is focused on protecting the health of every household in our community; however, lead from plumbing and fixtures can dissolve or break off into water and end up at the faucet. **There are no known sources of lead in the SSCSD drinking water system.** General guidelines on ways to lessen the risk from lead in drinking water are available from EPA's website at <https://www.epa.gov/ground-water-and-drinking-water/basic-information-about-lead-drinking-water>. Keep in mind that drinking water is not the only potential source of lead exposure, since lead can be found in air, soil, and paint. For more information on all sources of lead, visit <https://www.epa.gov/lead>.

As always, you may contact San Simeon CSD with any comments or questions at (805) 927-4778 or assistant@sansimeoncsd.org.

Please share this information with all the other people who drink this water, especially those who may not have received this notice directly (for example, people in apartments, nursing homes, schools, and businesses). You can do this by posting this public notice in a public place or distributing copies by hand or mail.
